

ASHUTOSH

UI/UX DESIGNER

Delhi, India • +91 88103 13719 • ashusinghaniya69@gmail.com • ashusinghaniya69-tech.github.io

PROFESSIONAL SUMMARY

UI/UX designer focused on scalable design systems and intuitive digital experiences across web and mobile. Skilled at translating business requirements into high-fidelity prototypes and production-ready interfaces, with a track record of measurably improving task efficiency — including a 30% reduction in task completion time on a fintech dashboard redesign — while maintaining rigorous visual and brand consistency. Comfortable working directly with stakeholders to define scope, present rationale, and align design decisions to business outcomes.

CORE COMPETENCIES

Design & Research · User Research · Information Architecture · Wireframing · Rapid Prototyping · Usability Testing · Interaction Design · Design Systems

Tools · Figma · FigJam · Adobe XD · Photoshop · Illustrator · VS Code

Technical · HTML5 · CSS3 · Responsive Design · Design-to-Code Handoff · AI-Assisted Design Workflows

SELECTED PROJECTS

Fintech Analytics Dashboard · LEAD DESIGNER

- Redesigned a data-dense, multi-account dashboard to fix poor navigation and weak data readability, the two top drivers of user drop-off in the prior version.
- Cut task completion steps by 30% by introducing customizable widgets and interactive data visualizations, validated through usability testing.
- Built a modular, tokenized design system in Figma to keep design and development in parity across platforms and reduce rework at handoff.

Metro Banking Mobile App · UX DESIGNER

- Designed an end-to-end mobile banking experience covering biometric login and fund transfers, with security and speed as the two competing constraints.
- Ran competitor benchmarking and user journey mapping to find and remove drop-off points in core transactional flows.
- Delivered high-fidelity, clickable prototypes with micro-interactions to walk stakeholders through screen transitions before development sign-off.

Analytics Admin Panel · UI DESIGNER

- Designed a data-heavy analytics dashboard (pulsewave) with dark-mode UI, combining charts, funnels, heatmaps, and live event feeds to help teams monitor product performance at a glance.
- Created an end-to-end dashboard UI design (pulsewave) simplifying complex product metrics-user activity, revenue, retention, and regional data-into into in intuitive, scannable interface.
- Pulsewave-Designed a real-time product analytics dashboard with interactive charts, funnels, and activity heatmaps.

EDUCATION & CERTIFICATIONS

UI/UX Design Certification — DICS Academy, Delhi (2024)

Specialization in user research, design systems, and micro-interactions.

Bachelor of Arts (B.A.) — School of Open Learning, Delhi University (Expected 2028)

KEY STRENGTHS

- Analytical precision — Meticulous attention to layout, typography, and spacing for professional-grade UI.
- Design advocacy — Articulates design rationale clearly and backs decisions with data when presenting to stakeholders.
- Collaborative mindset — Self-motivated, receptive to feedback, and adaptable to fast-paced agile environments.

EXPERIENCE

Pharmacy Associate – Roopchand Hospital

2023 - present

- Handled customer queries and workflow process, building a strong understanding of user pain points – insight now applied to designing initiative digital interface
- Manage medicine dispensing and inventory coordination with accuracy, while maintaining strong attention to detail under time-sensitive conditions.
- Balanced full-time hospital pharmacy responsibilities with UI/UX design education, demonstrating strong discipline, time management, and multitasking ability.
